**Re: Testimonial For Product Testing – FÉTIL**

First of all, we thank you very much for providing us a chance to explore and test Fétil bacteria. After 4 consecutive years of testing, we are pleased to issue this testimonial to you to show our appreciation.

Below are the actual testing program that had been carried out so far and also the results of testing;

<b>Testing Period</b>	February 2016 until present.
<b>Application</b>	20L manual sprayer – mist spray on the soil surrounding the trunk.
<b>Dilution</b>	1:100
<b>Frequency</b>	Once every month for the first 3 months, subsequently once every 2 months.
<b>Other Fertiliser</b>	Nil
<b>Testing Site</b>	Kebun Sennah II, Rantauprapat
<b>Block No</b>	D1
<b>Area</b>	14.74 Ha
<b>No. Of Trees</b>	3318
<b>Variety</b>	Marihat
<b>Year Planted</b>	1995

## Soil Conditions

As we followed exactly the methods of application as well as the volume and frequency, we have found out that the soil condition has been improved especially when we found earth worms easily after one year of testing. This is a good sign to us.

## Tree Conditions

2.1 Overall the trees appeared to be healthy, fronds are healthily green.

2.2 Ganoderma Boninence Disease (Basal Stem Rot)

We have been worried about Ganoderma Boninence disease all the time. We were observing closely in this issue and there are no sign of any Ganoderma Boninence found in the testing area so far.

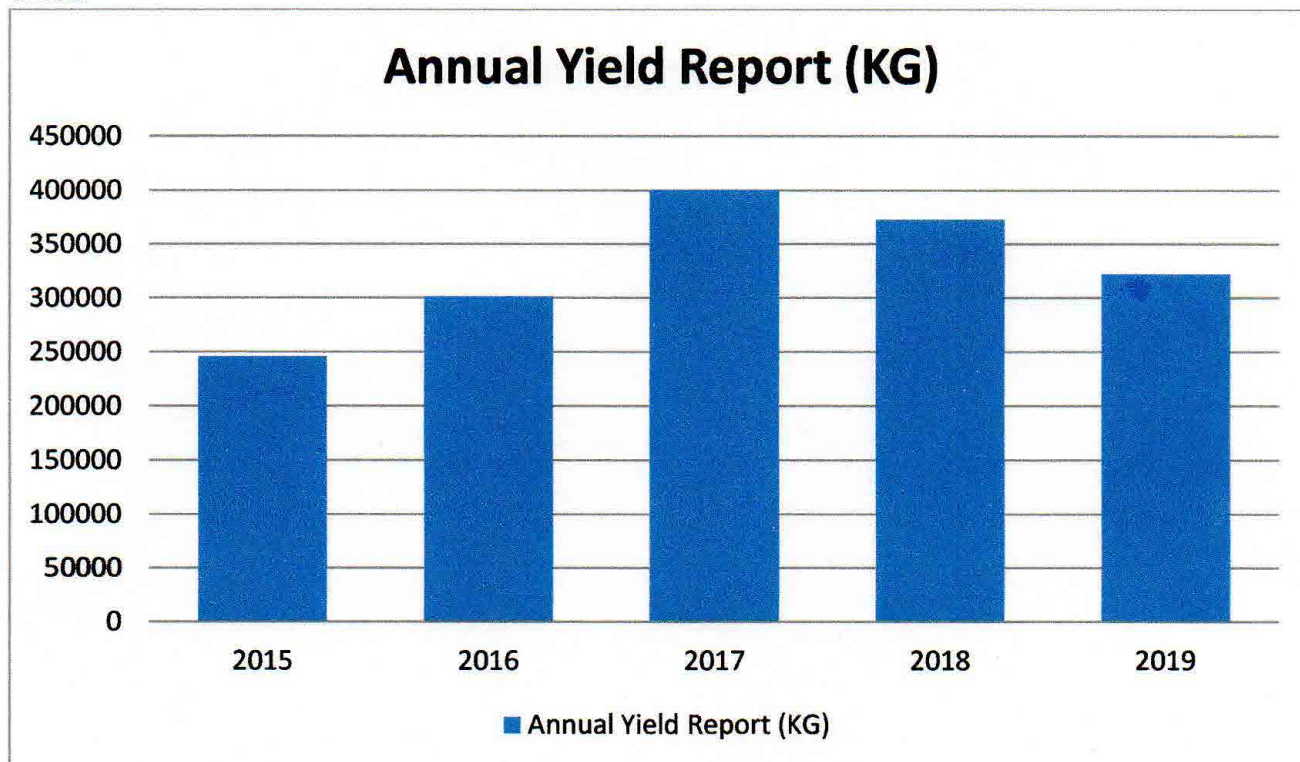

2.3 Nutrient

We have done our scheduled leaf analysis on 2015(before testing) and 2019(after testing), the results as follows

Year	N	P	K	Ca	Mg
2015	2.46	0.164	1.15	0.55	0.3
2019	2.11	0.149	1.17	0.82	0.31

The result is acceptable although it was slightly low on Nitrogen.

## Yield

Overall the yield has increased obviously ever since Fertil testing started.

The yield report shows that there are declining from the year 2018 and 2019 but it is still a positive to us.

## 4. Future development

With all the results shown above, we are agree to continue testing on Fétil bacteria until your SNI registration is completed and able to be sold legally in Indonesia. Then we will consider to purchase and start using it officially.

We hereby confirm the above data are true and correct. Thank you very much and good luck.
